# Easy PEL

## Recommended Uses

Easy PEL blend is suited to a variety of horticultural seeds and can be used for both encrustment and pelleting. This product must be used with Stix 1 or Stix 3 to give the coating strenght and help with adherence. Suitable for lettuce pelleting given the good shape forming and smooth finish of the pellet.

## Features & Benefits

Easy PEL blend is a medium weight material formulation for seed pelleting that provides the following characteristics.

- Produces smooth pellets
- Allow gases & water throught to the seeds
- Medium weight pallet

Depending on the effect you want to achieve there are a range of polymers, colours and finishing powders that can be used at the end of the pelleting process to either incorporate seed treatments or to help better identify your seed.

Use	Pelleting blend
Film	No
Encrust	Yes
Pellet	Yes
Binding Capacity	None
Opacity	High
Finish	Very smooth
Flow Rating	--
Dust Control	--
Colour(s)	White/Shiny

Coating Type

Properties

## Physical Properties

Form	Dry powder blend
Colour	White
Solubility	Insoluble

## Characteristics

Storage Instructions	Closed container, out of direct sunlight, protect from freezing
Shelf Life	12 months when stored correctly

## Application Guide

Easy PEL blend should be applied to wet seed, blend should be added gradually while spraying water polymer mixture. The blend does not have any binder itself, so will require a liquid polymer to be added during pelleting. The amount required will depend on the seed type, pellet size and strenght characteristics sought.
